EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Elizabeth Parsons (Reg. #52,499) on August 2, 2006.

Please amend the claims as follows:

Cancel claims 4-6, 24, 52-54, 57, and 58.

Election/Restrictions

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 7, directed to Species II, (Figure 1C and 2), is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. However, claims 4-6, 24, 52-54, 57, and 58, directed to the species of Figures 3-5, remain withdrawn from consideration since they depend upon or otherwise include all the limitations of an allowed generic claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the

Art Unit: 2815

limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

As noted above, withdrawn claims 4-6, 24, 52-54, 57, and 58 have been cancelled.

Allowable Subject Matter

Claims 1, 7-23, 49-51, 55, and 56 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record, either singularly or in combination, does not disclose or suggest the combination of limitations including a memory cell body comprising a glass electrolyte with conductive ions disposed therein, the memory cell body being formed entirely with the cell body via; a second insulating layer over the first insulating layer extending partially over the top surface of the memory cell body and defining an electrode via to the memory cell body; and a second electrode in contact with a top surface of the memory cell body and formed in the electrode via; wherein the second electrode contacts the top surface of the memory cell body without making contact with the sidewall of the memory cell body. It is recognized in the art that "top surface" is considered to be the top surface relative to the substrate (meaning the substrate is at the bottom of the device), since devices are built from the substrate up. This interpretation is consistent with what the ordinary artisan would consider conventional use of the terminology.

Art Unit: 2815

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
